RESISTANT

RESILIENT

SAFE

## Boat glazing

With our boat glazing made of resistant polycarbonate or acrylic glass, you can experience the vastness of the water combined with almost perfect safety, as our products are practically indestructible compared to conventional vehicle glass: Windows, covers, boxes and bulkheads.

## Walk-on glazing

Our walk-on glazing makes churches, museums and public and private buildings transparent and lively. Backlit, they set specific accents or simply reveal what would otherwise remain hidden.

Possible areas of application: Museums, churches, railway stations, airports, exhibition stands, shopping centres and stages.
